

Backend Engineer, AWS/GCP Cloud Developer Specialist, Data Eng. Expert

SUMMARY

A Professional with over 20 years of experience in software development using various technologies. He has worked with Java, Python, C#, and TypeScript. His expertise includes being hands on with cloud services (AWS/GCP) and enterprise-grade application support. Solid background in system integration across multiple domains, including:

- Financial systems: ISO8583, FIX, CNAB, positional formats
- Data engineering: Avro, Parquet, JSON
- Healthcare interoperability: HL7 (v2/v3) and FHIR

Highly experienced in designing high-performance distributed systems, modernizing legacy interfaces, and delivering reliable, large-scale enterprise integrations. Over 10 years of experience leading technical teams.

EDUCATION

Full Stack extension (React/Node); XPe; concluded in 2024.

Master on Information Technology Engineering; UTFPR; coursed 2 years in 2003 (not finished).

WEB Specialist; IPGB; concluded in 2003.

Bachelor's in information systems; SPEI; graduated in 2002.

SKILLS SUMMARY

Senior Software Engineer with deep expertise in Java and the Spring ecosystem (Spring Boot, Spring Data, Spring Cloud), along with Python (FastAPI/Spark), Go and Node.js (TypeScript/JavaScript). Specialized in microservices architectures and cloud-native platforms on AWS and GCP. Strong experience with AWS services including S3, SQS, SNS, EC2, Kinesis, Lambda, ECS/Fargate, and Aurora/RDS. Advocate of modern testing practices using JUnit, TDD, and BDD with Cucumber. Extensive database experience across Oracle, SQL Server, MySQL, and PostgreSQL (Aurora / AlloyDB).

LANGUAGES

- English (C1 – Advanced), Spanish (B1), Portuguese (C2 – Native).
- Currently studying French and Italian (A1 – in progress).

WORK EXPERIENCE

BTG – March 2025 to April 2026.

Java AWS Developer/ Aurora DBA Postgres

- Database support for Aurora Postgres 15/16/17 and support on ECS Fargate.
- Support App in Java 17/21 with Spring boot, Aurora PostgreSQL SQL tuning, and Python-based data pipelines.
- Worked on AWS serverless platforms using Golang and Node.js (NestJS).
- Event-Driven Architecture and system integration using Kafka (legacy) and AWS SQS/SNS

CERC (cerc.com) – July 2024 to March 2025.

Java GCP Developer/DBA SQL Server

- Full-stack development across Node.js (NestJS) and Java (Spring Boot) with SQL Server on GCP.
- Migrate Kafka to PUB/SUB on GCP with event driven architecture.
- Optimize SQL (Procedures T-SQL), Tests with Cucumber.

PortoSeguro Holding (portoseguro.com.br) – from October 2023 to July 2024.

Java AWS Full Stack Developer Sr

- Full-stack development across Node.js (NestJS) and Java (Spring Boot) microservices on AWS (RDS, S3, Kinesis, SQS, DynamoDB).
- Supported integrations using Sensedia API Gateway.

Livelo(livelo.com.br) – from March 2023 to September 2023.

Full Stack Developer Sr (Java on AWS)

- Supported applications in Java 11–17 with Spring Boot microservices, using Redis and Oracle on AWS.
- Integration with RabbitMQ/SQS and Front end with React.

Porto Seguro Holding (portoseguro.com.br) – from August 2021 to March 2023.

Full Stack Developer Sr (Java on AWS)

- Supported legacy Java applications during migration to Node.js and Java microservices.
- Backend development with Java 6–14 (Spring Boot), Node.js, and Kotlin; frontend with React and JSP/JSF (HTML, CSS, JavaScript).
- Worked in AWS environments (Dev/Prod) with MySQL, Oracle, and Informix databases; Redis, RabbitMQ(legacy) to Kafka, and Docker support.
- Insurance systems support: claims management and auto insurance platforms including Life insurance platforms, with interoperability healthcare stands such as HL7 v2/v3 and FHIR.

Intelipost (intelipost.com.br) – from August 2020 to July 2021

Performance tuning expert (Java and SQL)

- Supported legacy Java applications during migration to Node.js and Java microservices.
- Microservices development using Java 8/11 (Spring Boot, GraphQL, Kafka, Kotlin) and Node.js (JavaScript/TypeScript) on AWS.
- Database support for PostgreSQL, MongoDB, and Redis
- system integration: migrate RabbitMQ to Kafka.

Oi/ Sonda IT (sonda.com/pt) – from August 2010 to June 2020

Performance tuning expert – Tech Lead – DBA Specialist

- Software development in Java (Spring Boot), PL/SQL (Oracle/PostgreSQL), T-SQL (SQL Server) and C# on AWS.
- DB support/development and performance tuning: Oracle, SQL Server, PostgreSQL and Redis.

TCS /Equifax(tcs.com) – from August 2009 to August 2010

Back-End Developer Sr. – DBA Oracle

- Performance tuning (Oracle 10G and WebSphere 5.1/6.1 on AIX)
- Database design for OLTP and OLAP systems and batch and web development using Java 5/6.

InMetrics/Citibank – from March 2008 to July 2009

Back-End Developer Sr- System Support (Oracle Specialist)

- Development support on batch and web applications for performance
- Java/C# and Oracle (PL/SQL – procedures, functions and triggers)
- Capacity planning and stress test planning/execution, including production support.

Psystem/OpenSystem - April 2005 to March 2008.

Tech Lead – (Hands-on Java/C# and T-SQL)

- Technical lead for ERP migration project (PROGRESS client/server to web based)
- SQL Server 2000 and 2005 database administration and development
- Database design and system architect for web base ERP.
- Java and C# Developer (Code Review and performance improvement).

ICI (ici.curitiba.org.br) – January 2003 to April 2005

Performance tuning expert –DBA SQL/Oracle Specialist – Back-End Developer Sr (C#, Java, and VB 6.0)

- WEB Development with C# (ASP.NET), Java (JSF/JavaScript) and VB 6.0 (ASP).
- DBA/AD for OLTP and BI applications
- Production support for Oracle, SQL Server and PostgreSQL databases.

Microsoft (MCS)/ HSBC Bank –March 2002 to January 2003

Performance tuning expert – Back-End Developer Sr

- Performance-focused development in VB 6.0 and C#.
- Migrate old VB/COM+ APP to new C# Microservices.
- DBA/AD application support for mission-critical OLTP SQL Server and BizTalk.
- Developed T-SQL stored procedures and performed database modeling.
